

## **SAFER SPACE GUIDELINES:**

1. You can choose your way of participation. You can take part verbally or non-verbally.
2. Let's try to use common language.
3. Let's respect and listen to others. Let's only talk from our own perspectives, not for others.
4. Let's try to acknowledge how much we are taking up space and in which situations.
5. You don't have to bring out your own position in relation to the issues at hand, but you are welcome to do that if you choose to.
6. The discussion is confidential in the sense that we all commit ourselves to judge how much we share about this situation outside this tour.
7. You can ask questions, and you can be unsure. If we are called out about something that we said or did, we will try our best to reflect it critically and change our ways if needed.
8. Let's try to avoid presupposing identities in each other.
9. You can freely leave the group whenever you want.
10. Taking photographs of the situation is not allowed without consent.
